## DETAILED ACTION

### Status of Application/Claims

1. The Examiner notes that this Application has a Board of Patent Appeals and Interferences Decision rendered herein. The Examiner was REVERSED.
2. The Examiner contacted the Applicant's representative, Scott D. Paul (Reg. #: 42, 984) 25 October 2010 at 12PM. It was agreed that a Notice of Allowance would be issued in this case.
3. **Claims 8 and 14 have been cancelled; NO Claims have been newly amended; NO Claims have been added;** hence, as such, **Claims 1-7, 9-13, and 15-18 are pending within this application.**

### *Allowable Subject Matter*

4. Claims 1-7, 9-13, and 15-18 are pending for allowance. The following is an examiner's statement of reasons for allowance:

The closest prior art references of record are Suzuki et al. (US PG Pub. No. 2002/0032616), [hereinafter Suzuki] and Schuba et al. (US PG Pub. No. 2002/0052842), [hereinafter Schuba].

Suzuki discloses a relay server to be installed in a payment system which is suitably used in a specially designed terminal having limited communication functions such as a portable telephone. The relay server is provided in the payment system including a user terminal to take payment procedures through a network, a shop server

Art Unit: 3684

to produce payment information containing amounts to be paid by a user, a payment server to perform payment processing through the network and a wallet server to maintain authentication information of the user and to request the payment server to take payment procedures. The relay server has a redirecting section used to transfer, when receiving procedure request information from the terminal, the information to the shop server and, when receiving the payment information from the shop server having acquired the request information, to transfer the payment information to the wallet server.

Schuba shows a method for initiating an electronic payment transaction. A filter (FI) receives a payment request and modifies it by adding transaction identification. It sends the modified payment request to a transaction server (WS), and payment request information containing the transaction identification to a communication terminal (MS). The transaction server (WS) receives the modified payment request and a payment initiation containing additional transaction identification from the communication terminal (MS). The transaction server (WS) compares the transaction identifications of the modified payment request and the payment initiation and performs the payment transaction if the transaction identifications correspond with each other. The invention moreover relates to a corresponding filter (FI) and a transaction server (WS), to a method for initiating the filter (FI) and to a computer program for initiating an electronic payment transaction and for initiating the filter (FI).

Independent Claims 1, 4, 7, and 13 their dependent Claims 2-3, 5-6, 9-12, and 15-18 are allowed because the closest prior art references Suzuki and Schuba when taken either individually or in any combination fail to teach, fairly suggest, or render obvious to one of ordinary skill in the art the step of: "...a composite profile generator configured to combine a plurality of MSWP profiles into a single, composite profile for routing payment messages in said proxy to the MSWP portal; ...".

The Board of Patent Appeals and Interferences noted that the Appellant argued that the following language in Claim 1 was distinguishable over the prior art: "...a composite profile generator configured to combine a plurality of MSWP profiles into a single, composite profile for routing payment messages in said proxy to the MSWP portal; ...".

Dependent Claims 2-3, 5-6, 9-12, and 15-18 are dependent upon Independent Claims 1, 4, 7, and 13 and thus have all the limitations of Claim 1 and is therefore, allowable for that reason.

5. Therefore, Claims 1-7, 9-13, and 15-18 are allowable over the prior art of record as argued by the Applicants representative in the response filed 29 December 2008. Additionally, the Examiner notes that this Application has a Board of Patent Appeals and Interferences Decision rendered herein. The Examiner was REVERSED.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 3684

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to BENJAMIN S. FIELDS whose telephone number is 571.272.9734. The examiner can normally be reached MONDAY THRU FRI between the hours of 9AM and 7PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, KAMBIZ ABDI can be reached at 571.272.6702. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
